AND WHEREAS, The Transporter has agreed to provide and operate his insulated/ refrigerated vehicle having **carrying capacity of ltrs. of milk with equivalent no of crates** 10 liters. of milk & weight of one crate is approximately 1.2 Kg and one Paneer Box equivalent to 4 no of crates) for transportation and distribution of milk and other products produced and marketed by the Milk union in Route Named**in consideration of per kilometer rate of Rupees(Rupees.....only) per under the terms and conditions mentioned hereinafter.**

NOW THEREFORE THIS AGREEMENT WITNESSES AS FOLLOWS:

Terms and Conditions

Terms and Conditions:

1. The second party (transporter for the mentioned route) will be liable to carry out and hand over the milk and milk products to the said distributor/retailer (according to challan). The contract will be valid from _____ to _____ and the second party will be liable for providing the service for the stipulated time period.

2. During the contract period, if the cost of fuel increases/decreases, by following the conventional rules of the Union, the first party will pay to the second party (Transporter) by increasing/decreasing the accepted rate per kilometer as per example provided below. Except the above mentioned point no change in per kilometer rate will be entertained during the contract period.

The payment for increase or decrease in fuel rate will be considered only if the average (monthly) rate of fuel increased or decreased by more than 50 paise per liter. The transporter has to produce an extra bill mentioning the extra amount due to the enhancement in fuel rate as well as in case of decrease in fuel rate, deduction will be done accordingly from the monthly bill of the transporter. The deducted or enhanced rate per kilometer will be calculated as per illustration given below:

For change in retail diesel price effective at Berhampore, the consumption of diesel for different carrying capacity vehicle will be considered as below.

Crate capacity of vehicle (insulated)	Fuel consumption per kilometer
650	6 km.
550	7 km.
350	8 km.
220	10 Km
55	16 km

Illustrated example:

If approved based rate during diesel rate Rs 70/- is Rs 15.00/Km for a route of 150 Km. If price of diesel is hiked by Rs.3/- . For a 350 crate capacity insulated vehicle, the calculation is as follows:

Diesel consumption for the vehicle = $(150/8) = 18.75$ liter.

Increase in expenditure = $(18.75 \times 3) = \text{Rs. } 56.25$

Increase in rate/Km = $(56.25/150) = 0.375$

New per Km rate = $(15+0.375) = \text{Rs. } 15.375/\text{Km}$

If approved based rate during diesel rate Rs 70/- is Rs 15.00/Km for a route of 150 Km. If price of diesel is decreased by Rs.3/- . For a 350 crate capacity insulated vehicle, the calculation is as follows:

Diesel consumption for the vehicle = $(150/8) = 18.75$ liter.

Decrease in expenditure = $(18.75 \times 3) = \text{Rs. } 56.25$

Decrease in rate/Km = $(56.25/150) = 0.375$

New per Km rate = $(15 - 0.375) = \text{Rs. } 14.625/\text{Km}$

This will be over & above existing rate.

3. If the service of the transporter is not found satisfactory or it is adverse to the interest of the Milk Union then the first party (Bhagirathi Milk Union) may terminate the contract at any time.
4. The second party / transporter will be liable to receive the milk and milk products from Feeder Dairy according to the challan and time table, provided by the Marketing Section and transport them through insulated/refrigerated cover vans to the distributor/retailer lying in the concerned route.
